

Why SurvivingSkin.org?

Did you know a tanning bed can kill you?

Facts about Melanoma:

Meghan Rothschild's presentation is filled with facts about Melanoma, the deadliest form of skin cancer. You will learn about skin cancer statistics, causes, and how melanoma becomes a deadly form of cancer. Plus, you will hear all about the *real* facts on indoor tanning use.

Do you know how to protect yourself from Melanoma?

Action Items and Helpful Tips:

Meghan's presentation will teach you some of the warning signs of melanoma, along with prevention tips and everyday changes you can make in your life to protect yourself. You'll learn about what factors increase your chances of getting melanoma, and how to limit your risk.

Why should you care?

An Emotional Connection:

Meghan will tell you about her first hand experience with cancer, and how she battled this disease during her college years. You will feel connected to her story and engaged by her emotional journey. Her presentation will leave you questioning your skin-safe behavior and make you think twice about getting a sun tan and taking care of your skin.

But is Skin Cancer really *that* important?

Melanoma rates are increasing *faster* than any other cancer! Is it the most common cancer among women ages 25-32. By using a tanning bed just once a month, you increase your risk of melanoma by **75%**! (MFNE.org) You be the judge... Skin cancer IS that important, so make the right choice and bring SurvivingSkin.org to your college, business, or seminar.
